

17x32" instant images available anywhere you need them

Long length DR with enhanced portability for conventional weight bearing exams along with added flexibility for room to room, supine, surgical and trauma imaging.

Long-view without stitching

01 Full length views in a single, instant exposure with one seamless length detector.

- **No stitching** alignment or motion retakes
- **Faster acquisition** of long-view images
- **Fewer exposures** lower patient exposure to radiation

Conventional imaging FDR D-EVO III G80i digital x-ray detector Conventional imaging FDR D-EVO III G80i digital x-ray detector

Mobility

At just 12 lbs* G80i is the world's lightest long length DR detector. Ultra-light positioning and cord-free design makes it easy to move from room to room.

04

Fluid protection

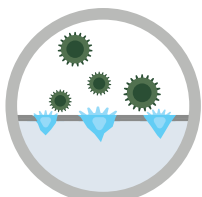

Smooth, sealed design protects circuitry from body fluids and disinfection wipe downs.

02

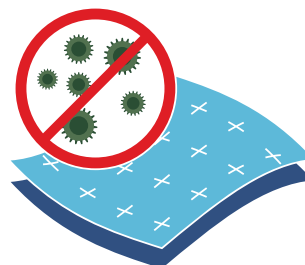

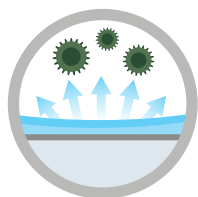

Antibacterial coating **Hydro Ag**

03 Fujifilm's proprietary Hydro Ag antibacterial coating effectively prevents 99.99%** bacterial growth on the detector's surfaces, enhancing infection controls and helping prevent HAIs.

10,000x more protection than no coating

100x more effective than conventional coatings

Optional Positioning Stands

Choice of stands provide optimal positioning for weight bearing upright, supine, cross table, table-top and even under the surgery table.

Mobile Articulating Stand

- upright & angled upright
- cross table
- supine

Mobile Upright Stand

- upright & angled
- upright cross table
